Season

KIOX  **PERFORMANCE**

Coming Season 2026 / 2027
Authentic-Intensive—Immersive-Proven

General Information-1

- This program aims to improve key conditioning abilities, including muscle tone, aerobic capacity, and coordination.
- It supports effective management of training load and fatigue during pre-season and helps reduce the risk of injury.
- Athletes are expected to maintain proper nutrition and adequate rest.
- Any missed session must be reported immediately to Coach Francis, who will adjust training load and volume accordingly to prevent overtraining and injury.

General Information-2

- This training-program is tailored to your current condition.
- Always follow the rate of perceived exertion (RPE) during the sessions.
- This training-program is just a fitness baseline foundation for the season 26/27.
- This training-program combine mobility, agility, stamina, strengthening, coordination and speed.

My Recommendations – The Basics

- Be well organized throughout the sessions
- Do not practice more than 120 min per session.
- If possible, completed the runs outdoors (forest, natural grass...), not on the beach.
- Make sure to complete and record every single running sessions.
- Send me each session latest at 9.30 pm with your RPE feedback.
- Use appropriate shoes/equipment for the sessions. Invest for your fitness!

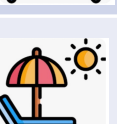

My Recommendations – Session & Steps

- A proper warm-up and enough drink it's a “must”.
- Use your cleats to complete the HIIT & sprint sessions. Use grass or artificial turf field.
- Strengthening sessions only under good physical-conditions. Not under pains / injuries.
- Share with me your subjective feeling of stress after each session RPE.
- Reach me out for any question, suggestion.
- I won't be available for any excuses! Hard work is the key!
